EXPERIENCE

Game Developer

April 2026 – Present

Rockbite Games

Yerevan, Armenia

- Develop and maintain gameplay systems in Java using the libGDX framework for a live, actively updated idle/incremental strategy title
- Implement core game loop mechanics, including resource and progression systems, sprite management, and UI, optimized for performance across target platforms
- Collaborate with designers and artists to translate design specs into functional libGDX systems, debugging and profiling to resolve performance issues in a shipped, live-service game

Security QA Engineer / Game Tester

September 2025 – Present

SARD Anti-Cheat

Yerevan, Armenia

- Test anti-cheat integration across multiple PC game clients, simulating player behaviors and edge cases, collaborate with developers to reproduce complex issues and document behavioral patterns
- Investigate player tickets for false positives and ban appeals, conducting controlled bypass attempts to identify vulnerabilities
- Debug client-side issues using Wireshark, Process Explorer, and System Informer for network traffic analysis and system-level debugging (kernel crashes, BSOD, minidump investigation)
- Developed a Python smoke-test tool that automates process, network connection, and suspicious file checks

GAME DEVELOPMENT PROJECTS

Kami Hovani | *Unity, C#, MVC Architecture, Git*

Jan 2025 – May 2025

- Developed complete 2D adventure game implementing character controllers, AI state machines, and interactive systems
- Applied design patterns (Singleton, Observer, State) for maintainable and scalable gameplay architecture
- Created comprehensive Game Design Document describing all systems and mechanics

Pingala | *Unity, Mobile Development, UI/UX*

May 2026 – June 2026

- Developed numbers-based puzzle game with focus on player progression and daily challenges
- Implemented touch controls and responsive UI for various mobile screen sizes

EXTRACURRICULAR ACTIVITIES

Game Developer

Jan 2026 – Present

Noor Coaching Program (NCP)

Yerevan, Armenia

- Completed a game development coaching program focused on Unity and C#, applying core design patterns in practical projects
- Built and iterated on game prototypes, deepening understanding of scalable gameplay systems

Game Developer

August 2022 – Present

Game Jams & Bootcamps

- Participated in multiple game jams (Game Jam 2024, GMITK Game Jam 2025, Game Jam 2026) and completed Khorata Games Development Bootcamp, building complete games within tight time constraints

EDUCATION

American University of Armenia

Yerevan, Armenia

Bachelor of Science in Computer Science

Aug. 2021 – May 2025

Relevant Coursework: Game Development, Object-Oriented Programming, Data Structures & Algorithms, Database Systems, Computer Organization, Machine Learning

TECHNICAL SKILLS

Game Development: libGDX, Unity, Level Design, Game Design Patterns, AI Behaviors, Playtesting

Programming: Java, C#

Tools & Systems: Git, Docker, Wireshark, Process Explorer, Linux, Windows, MacOS

Databases: MySQL, SQL, MongoDB

Languages: English (Fluent), Russian (Fluent), Armenian (Native)
